

March 30th, 2023

RE: Category Change Announcement

The CIFSC continually monitors and analyses the categorization of funds, the current category definitions and structures, as well as any new and developing trends in the investment funds industry. The purpose of the review is to ensure the logical, consistent categorization of investment funds and to maximize the similarity of investment strategies and risk-return profiles within each category. Categories should have a sufficient number of funds to allow for meaningful comparisons and rankings within the category.

On May 16th, 2022, the committee submitted a proposal to create a new Multi-Sector Fixed Income category. [see proposal here]. After a 30-day comment period the committee voted for implementing the changes. The results follow. The changes are effective March 31st, 2023 and will be reflected in the release of March 2023 month-end data. The initial list of funds that have been reclassified as Multi-Sector Fixed Income may be found in the Appendix.

1. New category: Multi-Sector Fixed Income

Proposed Category Definition:

Funds in the Multi-Sector Fixed Income category have an investment mandate stating that they strategically or tactically diversify their assets across several fixed income sectors including, but not limited to, government, municipal/provincial, corporate (including preferred shares), securitized (including asset-backed securities, collateralized loans, mortgage-backed securities, etc.), and high yield debt. Geographic exposure can span both developed and emerging markets. Canadian Fixed Income should be less than 90% to qualify. Inclusion in this category may be based on i) a written fixed income allocation policy meeting the above definition (i.e. in a fund's prospectus or written investment policy) that is explicit in defining a multi-sector mandate; ii) a portfolio manager's or subadviser's stated or known approach to managing portfolios; or iii) the fund's historical fixed income allocation tendencies. Namely, funds in this category should have no more than 65% of their holdings in a single fixed income sector and should demonstrate that they span at least three fixed income sectors over time, defined as a weighted average exposure of at least 10%.

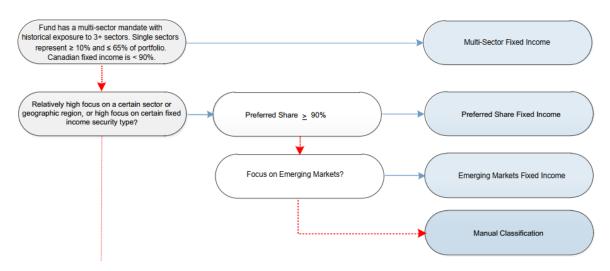

The CIFSC notes that funds in this category have, or are permitted to have, an average credit quality below investment grade (Lower than BBB or equivalent) and can hold in excess of 40% of the portfolio in high yield fixed income securities for prolonged periods of time, which would otherwise qualify the fund for the High Yield Fixed Income category.

An update to the CIFSC flow chart is included in **APPENDIX B**, outlining how the committee will test for qualification into the category.
