RE: French language version of the Responsible Investment identification framework

TORONTO, CANADA (November 29, 2024) – The Canadian Investment Funds Standards Committee is pleased to announce that the Responsible Investment Identification Framework is now available in French.

The framework, which was revised August 1st, 2024, incorporates feedback from the Investment Funds Institute of Canada and other asset managers. This updated version, differing from the July 2022 framework, aligns more closely with harmonized definitions from CFAI/GSIA/PRI and removes ESG integration as a recognized approach.
